## Foreword

Convention on Nuclear and Radioactive Material Safety, Security and Safeguards is the first convention that combines the topics of safety, security and safeguards and targeted to all Malaysians i.e. the public, the users, the radiation workers, the universities, enforcement agencies, government agencies and the industries.

It is organized with the spirit of togetherness, sharing, learning and discussing on the roles of each group of the society to ensure nuclear and radiation technology, with all its benefits is utilized in the highest standard of safety and security and ensuring this technology is only for peaceful purposes only.

### **Theme :**

Safeguarding Nuclear Technology and Ensuring the Safety and Security of Radioactive and Nuclear Material : Our Roles

### **Objectives :**

1. To promote a better informed society through sharing of correct and factual information on nuclear and radioactive materials and effort to ensure the safety of the public.
2. To build a higher level of self-compliance and safety and security culture among the users of radiation technology in Malaysia.
3. To enhance the competency and capability of national enforcement agencies through sharing of information on the latest technology available and efforts on capacity building within this region and in Malaysia.
4. To increase the awareness and understanding on the new control mechanism to safeguard nuclear and nuclear-related technology, materials and components so that it is utilized for peaceful purposes only.
